

## SEXI-FS workshop

(Spatially Explicit Individual-based Forest Simulator)

The second SEXI-FS workshop was held in Prince of Songkla University, Thailand from 24 to 26 August 2005. There were 20 participants mostly are lecturers, students and some of colleagues of the CFC project. After the workshop the participants spent 2 days visiting rubber based and fruit based mixed systems in Satun and Pattalung provinces. From there, they were reviewing some practical issues on data acquisition methodology for model calibration to Thai context.

A part from the workshops, presentation was also held in

Kasetsart University, Bangkok to introduce the model to some of colleagues, lecturers and students and get a good response. It's expected that the collaboration with the universities in Thailand will be continued and invited some of their students to visit Indonesia and see the implementation of the model in Indonesia case.
